Performance is historical and does not guarantee future results. Investment return and principal value will fluctuate with changing market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the data quoted. Investors cannot directly invest in an index, and unmanaged index returns do not reflect any fees, expenses, or sales charges. The volatility of an index may be materially different than that of the Fund, and investors should not expect the Fund to achieve the same results as a listed index. This material must be read along with the Fund's prospectus, which may be obtained at eventidefunds.com/prospectus. Performance data current to the most recent month-end may be obtained by calling 1-877-771-EVEN (3836).

1. Effective 11/01/2023, the Fund's name changed from the "Eventide Multi-Asset Income Fund." Also effective 11/01/2023, the Fund has adopted a policy to invest at least 25% of its assets in equity securities and at least 25% of its assets in fixed income securities. These clarifications are designed to help investors evaluate the Fund for purposes of investment planning, and there is no change to the Fund's management of investment strategies or objectives.
2. Does not include cash/money market funds/equivalents. Based on percentage of net assets. Holdings can change at any time, are subject to risks discussed in the Fund's prospectus, and should not be considered investment advice.
3. This chart is for illustrative purposes and assumes that a \$10,000 investment was made on the Fund's inception date of 07/15/2015 and that all dividends and capital

gains were reinvested. Hypothetical performance often shows markedly better results than actual management and should not be the basis for an investment decision. A variety of factors could impact investment decision making or otherwise cause differences between the hypothetical performance and actual investor returns.
4. Compares the Eventide Balanced Fund Class I's performance to index performance over the periods shown. Performance will differ for other fund classes, based upon fees and commissions.
5. The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.

6. On 06/30/2024, the Fund's benchmark composite changed from 50% Russell Midcap Total Return Index and 50% Bloomberg U.S. Intermediate Aggregate Bond Index to 50% Bloomberg US Mid Cap Index and 50% Bloomberg U.S. Intermediate Aggregate Bond Index because the Fund's Adviser believes it provides more value per cost while maintaining high standards of accuracy, relevance, and reliability. The Russell Midcap Total Return Index measures the performance of the mid-cap segment of the U.S. equity universe. The Bloomberg US Mid Cap Index is a float market-cap-weighted benchmark of the lower 800 in capitalization of the Bloomberg US 1000 Index, which is a float market-cap-weighted benchmark of the 1000 most highly capitalized US companies. The Bloomberg U.S. Intermediate Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market with less than 10 years to maturity. The securitized sector is wholly included. The index includes Treasuries, government-related and corporate securities, MBS (mortgage-backed securities), ABS (asset-backed securities), and CMBS (commercial mortgage-backed securities).
7. Performance figures for periods greater than 1 year are annualized. Annualized since inception figures use an inception date of 07/15/2015.
8. Prior to Q4 2020, Class N shares were displayed.
9. Represents the sum of all distributions from the period indicated. Distributions consist of dividend and interest income, capital gains, and/or return of capital. Shareholders should not assume that Fund distributions represent net profit. Income may be distributed regardless of whether such income will be treated as return of capital.
10. 12-Month Yield is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.
11. SEC Yield is based on a 30-day (or one-month) period ending 09/30/2024 and is calculated by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The SEC yield is a standardized measure of a mutual fund's yield, showing the annualized income earned by the fund over the past 30 days after expenses. The subsidized SEC yield displayed reflects uses net expenses in the calculation while the unsubsidized SEC yield uses gross expenses. For more information see SEC Form N-1A.

- Class A and Class C are also subject to a maximum deferred sales charge of 1.00%. This and other expenses that apply to a continued investment in the Fund are described in the Fund's prospectus.
- Refer to the Fund's SAI for definition of Other Expenses.
- The adviser has contractually agreed to waive fees and/or reimburse expenses of the Fund through 10/31/2024. The agreement may be terminated by the Fund's Board of Trustees only on 60 days' written notice.
- Effective 06/01/2022, Class I shares purchased directly from the Funds are not subject to the minimum initial or subsequent investment requirements.
- Allocation percentages are subject to change at any time, and should not be considered investment advice.
- Includes cash, cash equivalents, money market funds, impact bonds and options. Impact bonds fund business models that strive to have significant social or environmental effects.
- The range shows the highest and lowest turnover ratio reported in the Annual Report during the last three fiscal years, ending 06/30/2024. Portfolio turnover is the percentage of the portfolio that was bought or sold (lesser) during a fiscal year. A higher portfolio turnover may indicate higher transaction costs for the Fund, and may result in higher taxes for investors.
- Source: Morningstar, 06/30/2024. Average effective duration provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates.

The performance and risk factor comparisons are against the Bloomberg Mid Cap/Intermediate US Aggregate 50/50 TR Index. Prior to Q4 2020, Class N shares were displayed. Alpha is a measure of performance on a risk-adjusted basis. It takes the volatility (price risk) of a fund and compares its risk-adjusted performance to the Index. Any excess return of a fund relative to the return of the Index is a fund's alpha. Beta is a measure of the volatility of a fund relative to the Index. A beta greater than 1 is more volatile than the Index. R-Squared is a measure of how a fund's performance correlates with the Index's performance and it can help assess how likely it is that beta is statistically significant. Standard Deviation of return measures the amount of variation in historical performance from period to period.
- Annualized since inception figures use an inception date of 06/01/2015 and not the actual inception date of 07/15/2015 as only full month data is used in Market Risk calculations.

Mutual funds involve risk including the possible loss of principal. Past performance does not guarantee future results. The Fund's ethical values screening criteria could cause it to under-perform similar funds that do not have such screening criteria. The Fund can have risk related to option investing. Investors in the Fund should be aware that interest rates may change at any time based on government policy. In general, the price of a fixed income security falls when interest rates rise. Longer term securities may be more sensitive to changes in interest rates. The intermediate-term bond portion of the Fund's portfolio may represent 0% to 100% of the Fund's portfolio with an average duration of between two and

eight years. The Fund may invest, directly or indirectly, in "junk bonds." Such securities are speculative investments that carry greater risks than higher quality debt securities. The Fund can invest in smaller-sized companies which may experience higher failure rates than larger companies and normally have a lower trading volume than larger companies. There are unique risks associated with asset-backed securities, convertible securities, credit, foreign securities, hedging, income, LIBOR, MLPs, mortgage-backed securities, preferred stocks, prepayment, REITs, securities, U.S. Agency securities, and yieldcos that are covered in the Fund's prospectus and SAI.
