

# Healthcare & Life Sciences Fund Fact Sheet

December 31, 2024

Class I: ETIH X | Class A: ETAHX | Class C: ETCHX | Class N: ETNHX

The Eventide Healthcare & Life Sciences Fund seeks to provide long-term capital appreciation by investing in securities of healthcare and life sciences companies. The Fund invests in companies that we believe demonstrate values and business practices that are ethical, sustainable, and provide an attractive investment opportunity. The Fund also invests in securities with significant near-term appreciation potential. Under normal market conditions, the Fund will invest at least 80 percent of its net assets in equity and equity-related securities of companies in the healthcare and life sciences sectors.

**Performance is historical and does not guarantee future results. Investment return and principal value will fluctuate with changing market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the data quoted. Investors cannot directly invest in an index, and unmanaged index returns do not reflect any fees, expenses, or sales charges. The volatility of an index may be materially different than that of the Fund, and investors should not expect the Fund to achieve the same results as a listed index. This material must be read along with the Fund's prospectus, which may be obtained at [eventidefunds.com/prospectus](http://eventidefunds.com/prospectus). Performance data current to the most recent month-end may be obtained by calling 1-877-771-EVEN (3836).**

1. Does not include cash/money market funds/equivalents. Based on percentage of net assets. Holdings can change at any time, are subject to risks discussed in the Funds prospectus, and should not be considered investment advice.

2. This chart is for illustrative purposes and assumes that a \$10,000 investment was made on the Fund's inception date of 12/27/2012 and that all dividends and capital gains were reinvested. Hypothetical performance often shows markedly better results than actual management and should not be the basis for an investment decision. A variety of factors could impact investment decision making or otherwise cause differences between the hypothetical performance and actual investor returns.

3. Compares the Eventide Healthcare & Life Sciences Fund Class I's performance to index performance over the periods shown. Performance will differ for other fund classes, based upon fees and commissions. Prior to Q4 2020, Class N shares were displayed.

4. The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.

5. The S&P Biotechnology Select Industry Index represents the biotechnology sub-industry portion of the S&P Total Markets Index.

6. Performance figures for periods greater than 1 year are annualized. Annualized since inception figures use an inception date of 12/27/2012.

- Allocation percentages are subject to change at any time, and should not be considered investment advice.
- Includes cash, cash equivalents, money market funds and options.
- The range shows the highest and lowest turnover ratio reported in the Annual Report during the last three fiscal years, ending 06/30/2024. Portfolio turnover is the

- percentage of the portfolio that was bought or sold (lesser) during a fiscal year. A higher portfolio turnover may indicate higher transaction costs for the Fund, and may result in higher taxes for investors.
- The performance and risk factor comparisons are against the S&P Biotechnology Select Industry Index. Prior to Q4 2020, Class N shares were displayed. Alpha is a measure of performance on a risk-adjusted basis. It takes the volatility (price risk) of a fund and compares its risk-adjusted performance to the Index. Any excess return of a fund relative to the return of the Index is a fund's alpha. Beta is a measure of the volatility of a fund relative to the Index. A beta greater than 1 is more volatile than the Index. R-Squared is a measure of how a fund's performance correlates with the Index's performance and it can help assess how likely it is that beta is statistically significant. Standard Deviation of return measures the amount of variation in historical performance from period to period.
- Annualized since inception figures use an inception date of 01/01/2013 and not the actual inception date of 12/27/2012 as only full month data is used in Market Risk calculations.
